

E-Z Cable Anchor for Finished Ceilings

A sturdy, attractive, minimalist ceiling anchor designed for attaching signs to finished ceilings, including wood, plaster and drywall. Compatible with 1/16-inch aircraft cable with a ball end. The Satin Chrome finish delivers a clean, upscale appearance.

For best results, pair this anchor with our In-Line Steel Cable with Ball End (62-13000). The cable measures 78 inches (2m) in length.

Remove base cap to insert the cable and capture ball end.

The free end of the cable is compatible with the following UrbanTrapeze® sign connectors:

- UrbanTrapeze® Gated J-Hook (63-10001)
- UrbanTrapeze® In-Line Panel Holder (63-10002)
- UrbanTrapeze® 1.5 Cable Gripper (63-10015)

When installing into drywall or plaster ceilings, a proper screw anchor is required. Refer to the illustration below for one type of anchor. Select your anchor based on the weight of the ceiling display, as lighter-duty anchors may not provide sufficient holding strength.

Wood and drywall anchor screw not included.

Product ID: 60-10050
