

Maintaining The Clik-Clik MagPole

Maintaining the functionality of your MagPole installation tool is quite simple.

- Wipedown each section with clean, dry cloth
- Lubricate all sections with silicone spray or WD-40
- When collapsing the pole do NOT let it retract uncontrollably
- Check the locking mechanism and lubricate with silicone spray
- For storage, fully collapse the pole and secure it to prevent tipping
- Maintain vertical position during use to prevent excess force on threaded end
- When set aside during use, position the pole to prevent falling
- The one year warranty covers manufacturing defects
